Aditya Gaikar

Address: Dombivli, Mumbai | **Phone:** +91 9137640243 | **Email:** gaikaditya795@gmail.com
LinkedIn: linkedin.com/in/adityagaikar11 | **GitHub:** **https://github.com/AdityaGaikar91**

Technical Skills

Languages: JavaScript, TypeScript
Frontend: React.js, Next.js, Vite, Tailwind CSS, Redux, Shadcn UI
Backend: Node.js, Express.js, NestJS, REST API Design, JWT Authentication
Databases & Caching: PostgreSQL, MongoDB, Redis, TypeORM, Drizzle ORM, Mongoose
Cloud & Deployment: Vercel, Docker, Linux, Google Cloud Run, AWS (S3, EC2)
Tools & Integrations: Git, GitHub, Postman, Swagger

Professional Experience

Full Stack Developer—MetaMinds Studio

August 2026 – Present | Thane, India

- **Receivables Aging & SLA Analytics:** Wrote an overdue receivables ageing tracker (0–30, 31–60, 60+ days) and an approval-bottleneck SLA monitor using single-query PostgreSQL FILTER aggregations, replacing application-side loops with one database round trip.
- **Reactive Frontend & Search:** Built dashboards and data tables in React 19, TypeScript, Tailwind CSS v4 and RTK Query with cache invalidation and optimistic updates; added 350ms debounced search with AbortController cancellation to prevent redundant requests and stale-response overwrites.
- **Document Workflow & PDF Export:** Built the Minutes of Meeting (MoM) document engine and approval pipeline with Puppeteer/Chromium PDF export, scoping embedded CSS to stop style leaks into the SPA.
- **Careers Page:** Built the MetaMinds careers page using Next.js and Tailwind CSS.

Software Developer Intern—IDCLE TECH LLP

January 2026 – March 2026 | Mumbai, India

- Built 3 production government welfare scheme forms for divyangsahayak.maharashtra.gov.in using Angular, NestJS, and PostgreSQL, serving 500+ daily users
- Engineered a citizen data auto-fill feature that pre-populated form fields from existing API records, cutting per-application completion time by 2–3 minutes at scale
- Implemented JWT authentication, rate limiting (10 req/hr), CORS headers, and parameterized queries, plus class-validator DTOs that cut invalid form submissions by 60% and closed XSS gaps at the input boundary
- Integrated @nestjs-modules/mailer for transactional emails with an internal SMS API as fallback, achieving 100% notification delivery across all applicant types

Projects

AI Short Video Generator

- Developed a full-stack AI video platform integrating Google Gemini for script generation and Remotion for programmatic short-form rendering, acquiring 50+ active users post-launch
- Built an event-driven pipeline with Inngest, decoupling video generation tasks from the request lifecycle to handle concurrent jobs without blocking the UI
- Integrated ConvexDB as a real-time backend for live generation status, letting users track progress via reactive query subscriptions instead of polling
- Implemented Firebase Auth with Google OAuth, securing generation endpoints with token-based middleware and reducing sign-up to a single click

Education

Bachelor of Engineering (B.E.) – Information Technology Engineering — Konkan Gyanpeeth College of Engineering | 2021 – 2025 | CGPA: 6.75

Certifications: Building Modern Web Applications Using React, Git & GitHub Essentials – Internshala
